

NE ENGINEERING PLLC

COMPANY OVERVIEW

Full-spectrum engineering services, from concept through construction.

NE Engineering delivers design-build, construction management, construction oversight, quality control, safety oversight, and construction administration services trusted by clients across industries — every project led by a licensed PE, start to closeout.

"Responsive, transparent communication at every project phase — no surprises."

WHAT WE DO

01	Design-Build Services	Integrated design and construction delivery combining engineering expertise with construction management for streamlined execution.
02	Construction Management	Full lifecycle management from planning through construction closeout.
03	Construction Oversight	On-site engineering supervision ensuring work is executed in accordance with design documents and specifications.
04	Quality Control	Rigorous inspection, testing, and compliance verification to ensure every project meets the highest engineering standards.
05	Safety Oversight	Comprehensive safety planning, site monitoring, and regulatory compliance to protect workers and project integrity.
06	Construction Administration	Expert administration of construction contracts, RFI management, submittal review, and field observation.

WHY CLIENTS CHOOSE US

- ☐ Client-focused communication — responsive, transparent, no surprises.
- ☐ Licensed professional engineers — every project led by a licensed PE.
- ☐ Proven cross-sector track record — trusted across commercial, industrial, and municipal work.
- ☐ Cost-effective solutions — rigorous engineering without unnecessary overhead.

Let's work **together**.

Reach out to discuss your project requirements — our team of licensed professional engineers is ready to help.

We partner with public agencies, private developers, and industrial operators alike.
